9A3JH	TX/RX: K2 Elecraft PWR: 5 W ANT's: phased verticals + wires AGL: 0m ASL:270m
DK8NT	My 1st Gagarin Cup; FT857D, 100 W, wire antennas. Running as usual: Hopeless, but QSO rates of up to 100/h with S&P (well, just once ;-). Enough stations to keep me busy, but 10 m was dead for me: NO QSO! Almost no problems with the parallel contests (JA and some local ones). Thanks for the increased QSO points on the lowbands, and thanks for the contest organization, and to all participants!
DL5SWB	All QSOs via satellite VO-52 (435 up / 145 down).
