

## GC-2021 SOAPBOX

9A2EY	VERY VERY GOOD IDEA TO HAVE GAGARIN CUP ON THE GEOSTACIONARY SATELLITE. I ENJOY VERY MUCH WORKING MANY NEW CALL SIGNS.
9A5MPV	Nice test, hr u next yr, 73 Vlado
D1M	IC-718, ANT DIPOLE 3.5Mhz
DF2ET	Tnx nice contest :)
DJ0MY	Only participated around 4h total operating time...
DL1THB	TS480SAT, 80 Wtt, TITAN DX, 3m up
DL5XL	It was great to see so much activity in the upper band segment of QO-100 for the first time. There were not yet enough stations to keep you busy for the full 24 hours, so I took long breaks and came back to the radio regularly to pick up a few new ones. I used ADALM Pluto SDR together with SDR Console software which inter-faced nicely with N1MM software so that I could use the bandmap. Thanks for including geostationary satellites into Yuri Gagarin Contest, it was a lot of fun, and I found a few new features in the software while I operated.
DL8FMA/P	portable 5/8 vertical
DM0A	many Tnx for Qs. had some fun in GC.
DP5X	OP DL5JQ
E70T	Some stations gave a CQ zone, and I left as the logger recognized. These are UA1ALD 16z and A41JZ 21z. I wish you a lot of success in your work and see you next year. 73 Vlado, E70T
EU1AI	Tnx for Gagarin Contest
